

LEARNING ON COUNTRY

ALL AGES ACTIVITY

An activity for mob to connect with nature as our ancestors have since the beginning of time. This is Country through your ears, your eyes, your creative expression.

WALK SENSE CREATE SHARE

WALK

Take a walk outside with your family/carers - this could be to your balcony or garden, to your local park or body of water. Bring a notebook and pencil or a device you can record or take notes on. Take a quiet moment to be with Country as your ancestors have for many years.

SENSE

Use your senses (listen, see, smell), pay attention to environment that surrounds you, focus on one element that engages you (a bird, a tree, the force of the wind, the movement of water, etc) and record information about that one element to take home (make a mind map, take a photo, etc).

CREATE

With the information you have recorded from your walk, it's now time to get creative! Make a piece of art, a poem, a short story or a song with any materials you have around your home - there are no limits!

SHARE

Show your creations of Country through your eyes to your family and friends via phone and video calls and email.
